PRESS RELEASE

DATE: February 20, 2009

RELEASE DATE: Immediate

Mifflintown, PA. – DuMor, Inc., a leading manufacturer of indoor and outdoor site furnishings, celebrates its 25th anniversary this month. DuMor began operations in 1984 with two employees, its founders, Dick Rudy and Don Saner and 4,800 square feet of newly constructed manufacturing space in the Juniata County Industrial Park. It offered 4 wood bench designs, 2 wood receptacle designs, 2 park grill designs, and 1 picnic table design.

Over the last 25 years, DuMor has grown steadily and now employs close to 100 people in a facility totaling nearly 85,000 square feet. Today, DuMor's standard product line has expanded to include over 65 bench designs in a full range of colors and materials such as wood, steel, and recycled plastic. In addition to benches, the company manufactures over 25 receptacle designs and more than 10 table designs. DuMor also produces ash urns, bollards, bike racks, grills, and planters. Besides its standard product line, one of DuMor's strengths is the ability to design and produce custom pieces.

DuMor products are placed domestically and internationally in a wide variety of venues. In the United States, the company's creations can be seen in places like Hershey Park, Penn State University, and the City of Pittsburgh as well as Ruby Tuesday restaurants, Riverwalk, the Memphis Zoo, and the City of Boston.
